But Will Not Repeat

BY MRS. ELIZABETH THOMPSON.

Dear Mrs. Thompson—I am very much worried and need your advice. I am a girl of 20 and am engaged to a man 24 When he placed the ring upon my finger I put my arms around

his neck and kissed him, as a seal and proof of my sincerity

love and confidence.

love and confidence.

I have gone out with many boys before my engagement, and I told him that was the first kies I had ever given, and my last until he brought the wedding ring in October. By way of explanation I told him that while I loved him with all my heart and soul, I did not think it ladylike to indulge in such familiarity while engaged, but that would remain ever true and pay compound interest after marriage. Now he says that he would much prefer his dues as they come, instead of that compound interest, and that I am robbing him of his just rights. By nature I am just as affectionate as he, but a shor familiarity to the extent that I will break the engagement, if it kills me, rather than a husband. I do not go out with any other men, because I have no desire, although he does not live in town, but 40 miles away. I have no desire, although he does not live in town, but 40 miles away. I have no desire, although he does not live in town, but 40 miles away. I have learned that he oftee had to go one to advise me, so tell me what to do and which one of us is right.

TROUBLED.

Women like you are certainly rare, and I must say that to me you are a jewel, and any man who has your love is indeed fortunate. I admire you betaken, and agree with you to the limit. When a woman makes her kisses common before the ceremony is said they are not so appreciated afterward. There is always a chance for many a slip, and I feel sure the man will love you better for your opinion. Do not worry, he will not let you break the engagement.

Dear Mrs. Thompson—I am writing to the care that to me you are a jivel, and any man who has your love is indeed fortunate. I admire you better for your opinion. Do not worry, he will not let you break the engagement.

Dear Mrs. Thompson—Once I was very much in love with a young man, and so of far, he has proven true, but lately I have learned that he ofce had to go to the series of the wild in the order of the series of the

Congress Vacates.

Congression stonded leader of the majority really flore not entertain any of the congressional functions. He applesions in this manner for adjourning congress on Saturday with its program incompleted: "There are times when the country is just as happy and just as well off with congress in ad-

Poor old congress! Its members have been worried and abused to much that they can not stand it any longer. The country had told them so often it is tired of them that Now they believe it and so for a vacation back to private life-proferably away off in the coun-try where they can forget about their public appearances and be left alone.

For once it Democratic president agrees with them. Mr. Wilson conmented very unkindly on congress in explaining to Ore, union heads why he did not want to call a summer session:

"In the then of the record of the present congress. I have no reason whatever to hope that its continuance in session would result in constructive measures for the relief of the economic conditions to which you call attention. The sins of the Republican congreso

have been mainly sins of omission. The railroads were returned to their owners, but long after the date originally set, and meanwhile the treasury was steadily disbursing for their support The merchant marine bill was only rushed through at the very last, and here again the public had to maintain a huge fleet of merchant ships long after they ought to have been sold to private owners.

Some of the congressional omissions never have been renaired. One of these is the failure to pass or even to consider any legislation tending to remed; our economic Ills, which are legion, and to bring down the high level of prices. The taxes have not been materially modified, though they impose a heavy handicap upon the business of the country.

Most notable of all the failures of congress was the senate's incapacity to ome to any agreement on the peace treaty. Democratic stubbornness and Republican contumacy proved a combination too strong to give way to mere ly patriotic considerations. There were bitter-enders who would have none of the president's league of nations der any circumstances, and there were die-hards who would have nothing bu the covenant as it came inspired from on high, without the dotting of an ! or the crossing of a t. Between these impossible extremists there were enough two-thirds for the treaty with certain clear-cut minimum reservations, but these fell out over questions of grammar, spelling, wording and rhetoric involved in the writing of the reservations, and nothing could be done,

Some of the omissions of a congres such as the president has considered the last one to be are naturally mad ters of congratulation. In spite of all the attention devoted to the spection of a cash bonus for the sobliers of the late war, the measure was hare; passed by the lower house on one or the last days of the session and allowed to die an easy death in the archives o a senatorial committee: to thic manner neither party has to shoulder the responsibility for detesting a bill tha would have been bad for the country unscrupulous propagands in its support

Neither has the congress passed the laws recommended by the president inthe pursuance of his constitutional to agree in a number of vacce was such legislation as the congress oil the top of his head in the plan where manage to pass. The most notable of the hair ought to grow. So far as resolution repeating the war acts and making pence with decimals. Ourse upon a time, when Uncle Wiggily Longears, the funny bunny rabbit geniteman, was out waiking with Jacko Kinkytat, the menkey boy, the two friends came to a green grove in the woods where some of the animal girls were playing. Oh, just a moment, if you please. The animal girls, among who were Jennie Chipmunk and Susib Littletail, were not exactly playing—they were, rather, sitting around on stumps and logs.

"What's the matter, girls?" asked Incle Wiggily as he and Jacko reached the green grove. "Are you tired of having fun?"

"The no," answered Lulu Wibblewobble the duck girl. "But we have been jumping our wilk grape vine ropes until we are tired."

"Tired?" laughed Uncle Wiggily, so that his pluk nose twinkled like a clunk of strawberry the cream. Dear Mrs. Thompson—We are two girls who have been reading your column for some time and your advice is so good that we are writing to ask if there is any harm in a boy or girl sitting on the porch until after 11 o'clock in the hot summer time? When girls are in a drug store and a boy comes in and sits at the table with them, must they offer him a drink, or must the boy offer to pay for it? If a boy has a date with a girl should the boy or the girl saggest going to church? Which side should a boy stay on when walking with a girl, the inside or outside? If at a party and two boys ask two girls to go to the drug store with tem, is it all right? When playing a game in which couples go walking, a boy carries the hostess and instead of walking they just ride a little in town, is that let how to behave there is nothing improper in sitting on the porch until that hour. Yes, you could invite the boy to join you in your drink, but he, naturally, would pay your cheek anyways. The girl is usually the one who has to suggest going to church! I do not know many boys who are keen on seending their Sunday evenings at church with a girl, though I think I tooks mighty nice. A boy always walks Z IE

HOROSCOPE

TUESDAY, JUNE 15 1920.
(Copyright, 1920, by the McClure Newse paper Syndicate.)
This is a lucky day, according to astrology, for Neptune and Jupiter rule strongly for good.
It is a rule said to be fortunate for speculation or financial ventures that offer large rewards.
Trade and commerce are well directed at this time, and rumors of possible panic or money stringency should be watched and suspiciously, since trickery and treachery are foreshadowed.

trickery and treachery are foreshadowed.

There is an encouraging sign for travel on the water but many will journey across seas, only to meet many disappointments and large expenses. Clearer vision on the part of the people who look beneath the surface of things is predicted. Strong reactions of opinion are prognosticated.

Early in the morning Saturn is in evil place, making for some sort of trouble for farmers, who will be instrumental in making a startling result in the election returns of more than one state.

Theaters should benefit at this time, even though the summer is at hand for the planetary direction seems to pressage extraordinary interest in all things dramatic.

things dramatic.

Danger of mining troubles and a coal strike again are foreseen.

This should be a lucky wedding day in the sense that it seems to lead to material success.

Growth of radical ideas and the spread of the most progressive ideas will be marked in the next few months.

spread of the most progressive desays will be marked in the next few months. Repeatedly those who read the stars lave warned the world that a new order of things must be recognized and they now declare that the United States is in a state of intellectual revolution that will be powerful in the effects. The leveling of all ranks and the readjustment of society is to be as marked in this country as abroad, although manifested in other ways, astrologers prophesy. Persons whose birth date it is may expect changes in the coming year, especially if born in the morning.

Children born on this day may have many vicissifieds during life and should be carefully prepared for their straggle with human problems. They are likely to be intented and very sensitive.
